

Define Discover Do

Aligning with the Discover component of the Center's development framework, the Career and Professional Development Center presents a new program for students: Career Treks.

The Career Treks Program allows students to explore different organizations and experience day-to-day business with a behind-the-scenes look into industries to help them visualize their future.

During on-site visits, students are able to examine business culture and how companies engage in current workplace issues. Additionally, students can network with employers and learn about jobs, fellowships or internships that may be available.

To optimize the Employer-Rattler connection, the Career Center will collaborate with your organization to develop an engaging itinerary that includes:

- Interactive tours of the facilities
- Presentations from recruiters on how to apply for professional openings
- Networking opportunities with a variety of company departments
- Q&A sessions with host organization employees
